Poonamchand Gupta Vocational College, Khandwa —

Bachelor of Science in computer Science

July 2018 - Mar2020

PROJECTS

Live Project : AGG

Technology : Used: React.js, Material UI, HTML, CSS, Bootstrap, JavaScript

Description:

Developed a dynamic gaming frontend application using React.js and Material UI to create an engaging user interface for AGG.

Integrated various gaming APIs to manage game data and user interactions, enabling features like game score tracking, player profiles, and real-time updates.

Designed responsive and interactive user interfaces utilizing HTML, CSS, and Bootstrap, ensuring the provided a seamless experience across different devices and screen sizes.

Implemented advanced client-side functionalities with JavaScript, including game state management, interactive animations, and real-time game logic.
